

About Gangneung

Based on such geological characteristics, Gangneung is warmer in winter and cooler in summer than the rest of the country. This also makes temperature fluctuations smaller than other regions. When the northeaster air stream affects for a long time, there's large snow fall during winter and rain fall during summer. Due to the influence of Baekdudaegan Mountains, strong wind is often observed during winter and spring, and sometimes it leads to large wild fire during dry springs.

- **A Global *Festival***

The Olympic and Paralympic Winter Games PyeongChang 2018, a global festival, were held in Korea. Gangneung was the home to the ice sport events for the 2018 PyeongChang Winter Olympics, where guests from around world can experience the various cultural events Korea's.

- **Exploring the Atmosphere of Gangneung**

Gangneung's morning, day and nighttime flow alongside nature. People promenade through the forest trails, filled with the scent of pine, and organize their thoughts in quiet and peace. They dive into the blue waves of the sea in the afternoon, and watch the sun fall beyond the horizon at night and rise again to announce a new day. The people of Gangneung know how to appreciate a good cup of coffee. Gangneung is a place of romance and calm, where you can enjoy nature and coffee.
